

Questionnaire: Technical Feasibility and Risk Assessment

Personal Information

- **Name:** Mr. M Tahir Anis
- **Role:** Software Engineer
- **Organization:** Maanz AI
- **Years of Experience:** 2

Introduction

This questionnaire aims to assess the technical feasibility and potential risks associated with the project.

Questions

1. Technical Challenges:

- What are the major technical challenges you foresee in the project?
- How can these challenges be mitigated?

2. Feasibility:

- How feasible is the implementation of the proposed system within the given timeline and resources?
- What alternative solutions or approaches could be considered?

3. Risk Management:

- What are the potential risks associated with the system's development and deployment?
- How can these risks be effectively managed and mitigated?

4. Technological Dependencies:

- What are the critical technological dependencies for the project?
- How reliable and mature are these technologies?

5. Resource Requirements:

- What resources (e.g., hardware, software, personnel) are required for successful implementation?
- Are there any gaps in the current resource availability?

Conclusion

Thank you for your time and valuable insights. Your feedback will greatly contribute to the success of our project.
